Toothpics - An Introduction to Digital Dental Photography

The main focus of this presentation is to show you that digital photography is easy, fun, and profitable. You'll discover the proper tools to capture spectacular digital intra-oral images with point-and-shoot ease. Learning to manage your images will be simple with introductions to the latest software titles and a quick PowerPoint tutorial.

You will benefit from Rick's 20 years of photographic experience (9 years in digital dental photography) and his ability to relate complex subjects in simple terms. Rick will also show you techniques he's discovered that aren't found in the owner's manual!

Topics

- ☀ Understanding digital photography
- ☀ Information on the latest cameras
- ☀ Choosing the right equipment
- ☀ Shooting techniques for a full clinical series
- ☀ Learn Portrait Photography techniques
- ☀ Choosing the best software
- ☀ Image organization and storage
- ☀ Learn to make a quick slide show
- ☀ Color management for printing and the Web

Hands On

Hands on training can be made available for small groups. Larger groups can be accommodated with an additional presenter which I can provide upon request.

Customization

If you have special considerations we can work together to produce a custom fit presentation.

Confidence

You will leave with the knowledge and ability to apply these concepts the minute you return to your office. Most importantly... you are gonna have fun!
